Do you evaluate bike lanes or you want me to do it. Please let me know.

Thanks, jamal

=

=====

>>> Duncan Hughes 10/1/2007 11:24 AM >>>

We have issued work orders to Street Division for the installation of advisory speed signage and a truck prohibition and detour. Please be aware that the speed will not be enforceable, and neither will the truck prohibition. There is no way to sign for reduced speed in the bike lane. If there is a dangerous condition the bike lane should be closed.

Hasan can let you know when the signs will be installed.

Duncan

>>> Jamal Batta 10/01/07 11:14 AM >>>

Duncan:

I am getting lots of heat on this. We need to put signs to lower the speed to 25 mph and also to detour trucks from using the road. Hasan knows the urgency in case you need his help to move things fast over in the sign shop.

Another issue came up this morning regarding the bike lane as to its safety. I'll go to the site to see the width of the cracks in the bike lane so we may close it. For now, we need signs to caution people to slow in the bike lane.

The most critical area is between 5735 to 5685 Soledad Mountain Road.

Thanks, jamal

Date: October 01, 2007 9:23:08 PM
Subject: Re: Soledad Mountain Road Landslide

Tim: I will be happy to meet with you this week. However, as we discussed briefly today, your property is out of the area of our immediate concern near Mr. Crabbe's home. I met with your neighbor Joeseph Tsai at 2701 Palomino Circle late last week. His house is next to you on the corner. I couldn't find anything on Mr. Tsai's property that was inconsistent with the age and construction of the subdivision. He noted some of the same issues, and we suggested that he contact a plumber.

Have you had your plumbing checked by a licensed professional? We don't inspect sewer or water on private property, so that would be a good first step. We don't believe we have major leaks on our lines in the area; most of the time when there are leaks we notice them right away. I have not observed any water in the street near your home, nor distress to the pavement or sidewalk that appeared to be connected with large scale earth movement. Regardless, please leave me a contact telephone number and I will be happy to meet with you to discuss potential problems to your home.

Rob Hawk

Working Together to Engineer a Better Tomorrow

>>> <Ventimiglia_Tim@emc.com> 10/01/07 1:10 PM >>>

Robert and Jamal,

My name is Tim Ventimiglia. My wife, Chere, and I live at 5785 Soledad Mountain Road. I am emailing you due to the tremendous concern I have for the issues that are occurring on my street.

My neighbor at 5703 Soledad Mountain Road, Mr. Tom Crabbe, has filled me in on the details of the water leaks, possible sewer leak(s), and landslide that is occurring down our street. I've talked with one of the San Diego Gas & Electric employees today regarding the land movement, and he told me that the land has moved feet, not just inches! I see the damage to the street and the homes down my street, the damage to the street below us (Desert View), and I see that there are many city employees working on these issue. However, I still am very concerned for my property, and I wonder if I should be concerned for my life. The ground around my home is saturated with water. See attached pictures. This hole that I dug is approximately 2 feet deep, and shows how saturated the clay is. Even though this water, I assume, could be caused by the leaks down our street - approximately 1/2 block down - our house is also higher in altitude. This makes me wonder if there are other leaks. I would like for you to come by our home and take a look at this and provide an assessment of this information.

The below email is forwarded for your information. As discussed, the homeowner meetings will be documented. The letters to the homeowners will be prepared for distribution today. Additionally, a meeting with the entire group will be scheduled next week to provide an update on the City's plans, timelines and progress-to-date.

Please let me know if you have any questions or concerns.

Thanks,
Dave
